

169 MHz Antenna

Key Features

- 169 MHz
- Bendable whip
- SMA/m connector

Description

The AMB1930 is a robust antenna for 169 MHz applications. The antenna has a SMA/m connector. The antenna is equipped with a bendable whip.

Because of the antenna technology a ground plane is needed. The antenna is optimized to work with a square ground plane of 30 x 30 cm.

Range of Application

The AMB1930 is well suited for all 169 MHz applications where good radio performance is needed as for example in metering applications.
