21615 S.W. T-V HWY. • BEAVERTON OREGON 97003 • 503-642-9853
ASTRO TOOL FAX # 503-591-7766

TOOL NUMBER: **ASL439SS**

PLEASE NOTE: Astro Tool part number ASL439SS is a slotted, large micro-adjust crimp tool frame. Any specific gaging or tool setting determined for your application using a closed frame tool, will **not** produce identical results with this slotted version. The slotted design allows the tool to spread or “yawn” during the crimping process which may result in a slight asymmetrical crimp and alter crimp depth.

Additionally, in order to maintain the integrity of the slot, the tool is shipped with the 4th screw in place. Astro Tool recommends that this 4th screw be replaced when the tool is not in use.
